- 3) This application contains inventions/claims directed to more than one species of the generic invention.

Claim 15 is generic to a plurality of patentably distinct immunoadjuvant species, which are distinct from one another in their antigenic make-up or adjuvant composition: a) water-in-oil emulsion of Freund; b) light mineral oil; c) Arlacel A and Arlacel B; d) liposome-antigen combinations; e) cholera toxin B subunit conjugates; and f) monophosphoryl lipid A.

Should Applicants traverse on the ground that the species are not patentably distinct, Applicants should submit evidence or identify such evidence now of record, showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the Examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C § 103(a) of the other invention.
